LOGIQ® S8

Superb imaging

Simplified workflow

Scalable to your needs

Provide excellent care for your patients with the LOGIQ® S8.

We are committed to providing you with superb imaging and simplified workflow in an ultrasound system scalable to your needs. This enables you to make clinical decisions with greater confidence and better support your daily clinical needs.

Superb imaging to improve your clinical confidence

The migration of the Agile Acoustic Technology into the LOGIQ® S8 S-Agile Architecture combined with the power of E-Series transducers leads to superb image quality in a wide range of clinical applications including abdominal, musculoskeletal, small parts, breast, vascular, cardiology and more.

amazing.

Features taking your imaging to the next level of excellence

Elastography

Covering a wide range of applications, the Elastography package increases your diagnostic confidence thanks to a comprehensive set of features including E-Index and Q-Analysis tools based on GE exclusive Raw Data processing.

Dual mode imaging displaying both acoustic and elastic properties of liver lesions

B-Flow

The B-Flow Mode, based on the GE exclusive coded technology, displays true flow hemodynamics without the limitations of Doppler, improving your clinical confidence in vascular assessment.

B Flow of the spleen vasculature

Contrast Enhanced Ultrasound (CEUS) including Raw Data TIC quantification

A full suite of settings to achieve superb contrast agent resolution, sensitivity and penetration in a variety of clinical applications.

Dual imaging of a liver lesion in arterial phase

Simplified workflow to increase your produc

The LOGIQ® S8 provides easy-to-use tools that help busy departments and practices improve workflow while securing exam consistency. All of that in a streamlined and innovative design, ensuring exceptional user comfort.

With a fully adjustable console and flat-screen, a very compact design and incredible scanning comfort, the LOGIQ® S8 follows the Society of Diagnostic Medical Sonographers (SDMS) guidelines.

With the LOGIQ® S8, moving your ultrasound system around is easier than ever before.

Four active pinless ports and one parking slot improve your flexibility in moving through a wide range of clinical applications.

Probe holders on both sides of the operating panel and light-weight cables keep the needed transducers available at your fingertips.

You can easily customize the system settings and commands using the large configurable touchscreen.

Scalable to your needs at your service throughout tailored solutions and a special relationship

With the LOGIQ® S8 vision, we are committed to help you face your challenges investing in programs and solutions that truly meet your daily needs.

Packages of technical features support further enhancement of your clinical confidence. Service and financing offerings secure your investment with value-for-money solutions. A wide range of educational proposals, including academic classroom trainings, online tutorials, LOGIQ Users Days, Meet the Experts workshops and more customized solutions tailored to your needs are at your disposal.

LOGIQClub, the LOGIQ Users community, offers to you exclusive advantages as free access to education, collaterals, applicative support, tips and tricks and a special care.

LOGIQ® S8 – Close to you to provide excellent care for your patients

tivity and scanning comfort

Tools that help you work smarter

Auto IMT and Auto calculations enable streamlined vascular risk assessment studies.

Elastography and 2D PDI/CFM quantification elevate your diagnostic and therapeutic assessment to a new level.

With Auto Optimization you achieve the best LOGIQ® S8 imaging settings in one keystroke.

GE exclusive Raw Data, enabling a wide variety of processing after the exam closes, saves your time and improves workflow.

Scan Assistant, the GE flexible and scalable scanning programs, helps you improve exam consistency, standardization and increase efficiency, reducing keystrokes and exam time.

amazing.

Spectacular resolution of gall bladder polyps

Colorized arterial flow frames a common carotid artery plaque while maintaining superb B-mode image quality

Outstanding color flow sensitivity in the small vessels of this abnormal lymph node

Apical Four Chamber View with Doppler demonstrating Shared Service capabilities

LOGIQView of Achilles Tendon repair

B-Flow Color showing flow hemodynamic within a diseased Carotid Artery
